Feb 2024 - Sep 2025

Information and Communication Technology

AGH University of Science and Technology

Bachelor of Science in Engineering

Oct 2020 - Feb 2024

Electronics and Telecommunications

AGH University of Science and Technology

WORK EXPERIENCE

Full Stack Developer

Oct 2023 – Present

LTL BALKAN

- Built and maintain an internal freight management system to support logistics operations between Poland and the Balkans
- Develop scalable web applications using Next.js and Node.js
- Design and manage relational database schemas with a focus on performance and maintainability
- Collaborate with company employees to translate logistics workflows into effective software solutions
- Define and implement backend architecture patterns, ensuring code quality and long-term maintainability

Frontend Developer

Nov 2022 – Oct 2025

Softnauts

- Build and maintain modern, responsive web applications using React and Next.js
- Translate design specifications into intuitive and accessible user interfaces in close collaboration with UI/UX teams
- Optimize frontend performance and ensure cross-browser compatibility and mobile responsiveness
- Collaborate with backend developers to implement and troubleshoot seamless API integrations

PROJECTS

Undisclosed financial project

Brokerage services platform facilitating B2B financing and complex deal structuring

Participated in the development of a new investor module, involving the creation of a distinct registration flow and extending the authentication model to support investor roles and privileges. Developed specialized dashboard features tailored to investor workflows. Additionally, maintained legacy features and resolved critical bugs to ensure platform stability.

Undisclosed educational project

Remote education platform for primary and high schools

Extended platform capabilities by implementing new types of interactive lessons. Contributed to the integration of proprietary LLM technologies to enhance educational content. Collaborated closely with the client to ensure the application met specific requirements while maintaining legacy features and resolving bugs.

nuumi.pl

Fashion affiliate marketing platform

Managed and supported the entire front-end architecture. Implemented key features including Structured Data (schema.org) support, comprehensive SEO and performance optimizations, and a full-stack newsletter subscription flow. Developed the product details page and executed a major dependency update, successfully resolving breaking changes in core libraries.

softnauts.com

Company portfolio page

Spearheaded SEO optimization efforts to improve site visibility. Developed and implemented specific SEO-focused pages in strict adherence to UI/UX design specifications utilizing Server-Side Rendering.

megarabaty.pl

Affiliate marketing platform

Took ownership of an in-progress codebase, driving the project through to completion and production deployment. Leveraged Server-Side Rendering to maximize SEO performance and collaborated closely with UI/UX designers to ensure pixel-perfect implementation of visual requirements.

promocjedlodzi.pl

Affiliate marketing platform for parents

Maintained and improved a legacy codebase, focusing on performance tuning and network request optimization. Engineered an optimized, recursive algorithm for building and rendering complex category trees.
